# **Safety Data Sheet**

286.0D - New-ton Base = D

### SECTION 1. Identification of the substance / mixture and of the company / undertaking

1.1. Product identifier Code:

286.0D

Name

New-ton Base = D

1.2. Relevant identified uses of the substance or mixture and uses advised against

Description / Use ANTIALGAE acrylic filler coating

1.3. Information on the supplier of the safety data sheet

Business name DI MAIO COLORI SRL

Address Via Madonna delle Grazie - Industrial area

Location and State 80030 Castello di Cisterna (NA)

Italy

tel. 081-8038645 fax 081-5213370

e-mail of the competent person

responsible for the safety data sheet sdsdimaiocolori@gmail.com

1.4. Emergency telephone number

For urgent information contact Di Maio Colori srl

Tel. +39 081 8038645 fax +39 081 5213370 hours of the poison control center AORNA Cardarelli Naples

Tel. +39 081 7472870 - 081 5753333 fax +39 081 7472868 Availability 24 h

### **SECTION 2. Hazards identification**

### 2.1. Substance or mixture classification

The product is not classified as dangerous according to the provisions of Regulation (EC) 1272/2008 (CLP).

However, since the product contains dangerous substances in a concentration such as to be declared in section 3, it requires a safety data sheet with adequate information, in compliance with Regulation (EU) 2015/830.

Hazard classification and indications:

#### 2.2. Label elements

Danger labeling pursuant to Regulation (EC) 1272/2008 (CLP) and subsequent amendments and adjustments.

Hazard pictograms: -

Warnings: --

286.0D - New-ton Base = D

Revision n. 2

Revision date 19/01/2018

Printed on 09/04/2018

Page no. 2/15

Hazard statements:

EUH210 EUH208 Safety data sheet available on request. Contains:

Mixture of: 5-chloro-2-methyl-2H-isothiazol-3-one; 2-methyl-2H-isothiazol-3-one, 1,2-benzisothiazol-3 (2H) -one

It can cause an allergic reaction.

Precautionary advice:

- -

#### 2.3. Other dangers

On the basis of available data, the product does not contain PBT or vPvB substances in percentage greater than 0.1%.

See section 11 for additional information on crystalline silica. The product is not classified as dangerous according to the "preparations" directive (1999/45 / EC); in fact it is a water-based preparation in which there are no components that lead to the classification of danger. The crystalline silica reported below, which originally is in the form of inhalable powders with specific exposure limits, after its mixing is amalgamated into the preparation no longer entails any risk of exposure.

### **SECTION 3. Composition / information on ingredients**

#### 3.1. Substances

Not relevant information

### 3.2. Blends

The full wording of the hazard statements (H) is given in section 16 of the sheet.

### **SECTION 4. First aid measures**

### 4.1. Description of first aid measures

EYES: Remove any contact lenses. Wash immediately and abundantly with water for at least 30/60 minutes, opening the eyelids well. Consult a physician immediately.

SKIN: Take off contaminated clothing. Take a shower immediately. Consult a physician immediately.

INGESTION: Give as much water to drink as possible. Consult a physician immediately. Do not induce vomiting unless expressly authorized by your doctor.

INHALATION: Call a doctor immediately. Take the person out into the fresh air, away from the scene of the accident. If breathing stops, give artificial respiration. Take adequate precautions for the rescuer.

#### 4.2. Most important symptoms and effects, both acute and delayed

No specific information on symptoms and effects caused by the product is known.

#### 4.3. Indication of any immediate medical attention and special treatment needed

Information not available

### **SECTION 5. Firefighting measures**

#### 5.1. Fire fighting

SUITABLE EXTINGUISHING MEDIA

The extinguishing media are the traditional ones: carbon dioxide, foam, powder and nebulized water.

UNSUITABLE EXTINGUISHING MEDIA

No one in particular.

#### 5.2. Special hazards arising from the substance or mixture

HAZARDS CAUSED BY EXPOSURE IN THE EVENT OF FIRE Avoid breathing combustion products.

#### 5.3. Recommendations for firefighters

#### **GENERAL INFORMATIONS**

Cool the containers with jets of water to avoid product decomposition and the development of substances potentially hazardous to health. Always wear full fire protection equipment. Collect the extinguishing water which must not be discharged into the sewers. Dispose of the contaminated water used for extinguishing and the residue of the fire according to current regulations.

EQUIPMENT

Normal clothing for firefighting, such as an open circuit compressed air breathing apparatus (EN 137), flame retardant suit (EN469), flame retardant gloves (EN 659) and fire brigade boots (HO A29 or A30).

#### **SECTION 6. Accidental release measures**

Revision n. 2

Page no. 4/15

Revision date 19/01/2018

Printed on 09/04/2018

### 286.0D - New-ton Base = D

#### 6.1. Personal precautions, protective equipment and emergency procedures

Stop the leak if there is no danger.

Wear suitable protective equipment (including personal protective equipment referred to in section 8 of the safety data sheet) to prevent contamination of skin, eyes and personal clothing. These indications are valid both for the workers and for emergency interventions.

#### 6.2. Environmental precautions

Prevent the product from entering sewers, surface water, groundwater.

#### 6.3. Methods and materials for containment and cleaning up

Suck up the leaked product into a suitable container. If the product is flammable, use explosion-proof equipment. Evaluate the compatibility of the container to be used with the product, checking section 10. Absorb the remainder with inert absorbent material.

Provide sufficient ventilation of the place affected by the leak. The disposal of contaminated material must be carried out in accordance with the provisions of point 13.

#### 6.4. Reference to other sections

Any information regarding personal protection and disposal is given in sections 8 and 13.

### **SECTION 7. Handling and storage**

#### 7.1. Precautions for Safe Handling

Keep away from heat, sparks and open flames, do not smoke or use matches or lighters. Without adequate ventilation, vapors can accumulate on the ground and catch fire even at a distance, if triggered, with the risk of backfire. Avoid the accumulation of electrostatic charges. Do not eat, drink or smoke during use. Remove contaminated clothing and protective equipment before entering eating areas. Avoid the dispersion of the product in the environment.

#### 7.2. Conditions for safe storage, including any incompatibilities

Keep only in the original container. Store in a cool and well-ventilated place, away from heat sources, open flames, sparks and other sources of ignition. Keep containers away from any incompatible materials, checking section 10.

#### 7.3. Specific end uses

Information not available

### **SECTION 8. Exposure controls / personal protection**

#### 8.1. Control parameters

Normative requirements:

VND = hazard identified but no DNEL / PNEC available; NEA = no exposure expected; NPI = no hazard identified.

#### 8.2. Exposure controls

Considering that the use of adequate technical measures should always take priority over personal protective equipment, ensure good ventilation in the workplace through effective local exhaust.

For the choice of personal protective equipment, if necessary, seek advice from your chemical suppliers. Personal protective equipment must bear the CE mark which certifies their compliance with current regulations.

### HAND PROTECTION

Protect hands with category III work gloves (ref. Standard EN 374).

For the final choice of the material of the work gloves it is necessary to consider: compatibility, degradation, breakage time and permeation. In the case of preparations, the resistance of work gloves to chemical agents must be checked before use as it is not foreseeable. Gloves have a wear time that depends on the duration and mode of use.

### SKIN PROTECTION

Wear category I professional long-sleeved work clothes and safety footwear (ref. Directive 89/686 / EEC and standard EN ISO 20344). Wash with soap and water after removing protective clothing.

#### **EYE PROTECTION**

It is recommended to wear airtight protective goggles (ref. Standard EN 166).

286.0D - New-ton Base = D

Revision n. 2

Revision date 19/01/2018

Printed on 09/04/2018

Page no. 6/15

#### RESPIRATORY PROTECTION

In case of exceeding the threshold value (eg TLV-TWA) of the substance or of one or more of the substances present in the product, it is recommended to wear a mask with a type B filter whose class (1, 2 or 3) must be chosen in relation to the limit concentration of use. (ref. standard EN 14387). If there are gases or vapors of a different nature and / or gases or vapors with particles (aerosols, fumes, mists, etc.), combined filters must be provided. The use of respiratory protection means is necessary if the technical measures adopted are not sufficient to limit the exposure of the worker to the threshold values taken into consideration. The protection offered by the masks is however limited.

In the event that the substance in question is odorless or its olfactory threshold is higher than the relative TLV-TWA and in the event of an emergency, wear an open-circuit compressed air breathing apparatus (ref. Standard EN 137) or a self-contained breathing apparatus. outdoor air (ref. EN 138 standard). For the correct choice of the respiratory protection device, refer to the EN 529 standard.

#### **ENVIRONMENTAL EXPOSURE CONTROLS**

Emissions from manufacturing processes, including those from ventilation equipment should be controlled for compliance with environmental protection legislation.

### **SECTION 9. Physical and chemical properties**

#### 9.1. Information on basic physical and chemical properties

Printed on 09/04/2018

Page no. 7/15

### 286.0D - New-ton Base = D

#### 10.3. Possibility of hazardous reactions

In normal conditions of use and storage no dangerous reactions are foreseeable.

#### 10.4. Conditions to avoid

None in particular. However, follow the usual precautions towards chemicals.

#### 10.5. Incompatible materials

Information not available

#### 10.6. Hazardous decomposition products

Information not available

### **SECTION 11. Toxicological information**

In the absence of experimental toxicological data on the product itself, any health hazards of the product have been assessed on the basis of the properties of the substances contained, according to the criteria established by the reference legislation for classification.

Therefore, consider the concentration of the individual dangerous substances possibly mentioned in sect. 3, to evaluate the toxicological effects deriving from exposure to the product.

#### 11.1. Information on toxicological effects

Routes of entry:

Ingestion: Yup
Inhalation: No
Contact: No

Carcinogenesis:
The IARC (International Agency for Research on Cancer) believes that crystalline silica inhaled in the workplace can cause lung cancer in humans. However, it should be noted that the carcinogenic effect depends on the characteristics of the silica and on the biological-physical condition of the environment. It seems proven that the risk of developing cancer is limited to people who already suffer from silicosis.

At the present stage of the studies, the protection of workers against silicosis would be guaranteed by respecting the current occupational exposure limit values.

Social dialogue on respirable crystalline silica

On April 26, 2006, a multi-sector social dialogue agreement was signed, based on a "Guide

to Good Practices"

, on the protection of the health of workers who are in contact with products  $% \left( 1\right) =\left( 1\right) \left( 1\right) \left($ 

containing crystalline silica. The text of the agreement published in the Official Journal of the European Union (2006 / C 279/02) and

the "Guide to Good Practices"

, with the attachments, are available at the internet address www.nepsi.eu and offer useful indications and information for handling products containing respirable crystalline silica.

#### 15.2. Chemical safety assessment

A chemical safety assessment has not been developed for the mixture and the substances it contains.

### **SECTION 16. Other information**

Text of hazard (H) indications mentioned in sections 2-3 of the sheet:

Acute Tox. 3 Acute toxicity, category 3
Acute Tox. 4 Acute toxicity, category 4

Specific target organ toxicity - repeated exposure, category 2 Skin

**Skin Corr. 1B** corrosion, category 1B

**Eye Dam. 1** Serious eye damage, category 1 Skin Skin Irrit. 2 irritation, category 2 Skin sensitization,

Skin Sens. 1 category 1

Aquatic Acute 1Hazardous to the aquatic environment, acute toxicity, category 1Aquatic Chronic 1Hazardous to the aquatic environment, chronic toxicity, category 1Aquatic Chronic 2Hazardous to the aquatic environment, chronic toxicity, category 2

**H301** Toxic if swallowed.

**H311** Toxic in contact with the skin.

H331 Toxic if inhaled.H302 Harmful if swallowed.

**H373** May cause damage to organs through prolonged or repeated exposure. It

**H314** causes serious skin burns and serious eye injuries.

H318 Causes serious eye damage.
